KION North America Corporation adds OnSite Services to dealer network

SUMMERVILLE, S.C. — KION North America Corporation announces the appointment of OnSite Services to its dealer network effective immediately.

Locally-owned and operated, OnSite Services is based in Boise, ID. For the last seven years, they have been a one-stop source for all industrial product support needs. With more than 30 employees, they specialize in service and repair, tire sales and pressing, operator training and custom commercial solutions.

In January, OnSite Services branched out into material handling equipment sales in order to truly become a full-service operation. Under the leadership of Dealer Principal Eric Holloway and General Manager David Son, OnSite Services' primary market area will be comprised of select counties in Idaho and Oregon.

"We believe in the value of quality," said David Son, General Manager. "We are confident in the quality of KION North America's brands and are glad we are now able to offer their trucks as solutions to our customers."

In line with their long-term business strategy, KION North America continues to grow their dealer network by adding reputable dealers in key regions.

"OnSite Services' focus on quality and customer service is the best in the region," said Mike Gore, KION North America's vice president of sales. "Coupled with their determination to succeed and ability to think outside the box, they are ideal long-term partners."

KION North America Corporation

KION North America Corporation is a member of the KION GROUP AG, the world's second largest manufacturer of industrial trucks. Their brand companies, Linde and STILL, serve the specific requirements of the U.S., Canadian and Mexican markets with a comprehensive and complementary product portfolio. Headquartered in Summerville, S.C., KION North America's production plant has an annual capacity of more than 10,000 trucks. Their products are known for their innovative technologies, low energy and low operating costs.
